1. The beginning of the specification should be amended to indicate that application 10/360,810 is now USPN 6,667,654.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 19-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Agaesse (USPN 5,252,910).

Fig. 5 shows a current mirror comprising a first transistor T5, a second transistor T1, a third transistor T2 and a load 2 arranged and functioning as recited in claims 19-23.

The Brooks et al. and Adams references also appear to anticipate claims 19-23.
